Enabling Java in your browser (for Windows):

1st:

Begin by navigating to your Control Panel.

2nd:

On the top right of the Control Panel, search for "java".

3rd:

Open the Java Control Panel by clicking on the Java icon.

4th:

Click on the "Security" tab on the top of the window.

<u>\$</u>	Java Control Panel	-	×	د
General Java Security Advanced				_

5th:

Select "Enable Java content in the browser" and lower the Security Level slider down to Medium

🧉 Java Control Panel – 🗆 🗙
General Java Security Advanced
✓ Enable Java content in the browser
Security Level
- Very High
- High (minimum recommended)
Medium
Least secure setting - All Java applications will be allowed to run after presenting a security prompt.

6th:

Apply the new settings and reload the page. If you are presented with a security prompt, allow java to run.
